

Dri-Shield System-033™

Products to Meet IPC/JEDEC J-STD-033

SCC has developed a system of products to help companies packaging SMD's meet the requirements of the Joint IPC/JEDEC Standard J-STD-033. This document creates standardized methods for packing, shipping, and handling moisture sensitive Surface Mount Devices. Requirements for Moisture Barrier Bags (MBB), Bag Labeling, Humidity Indicator Cards (HIC), and Desiccant loading have been established. SCC's Dri-Shield system meets each of these requirements.

1. Moisture Barrier Bag

Choose either Dri-Shield 3000 or Dri-Shield 3400. These bags exceed -033's MVTR requirement of <math><0.002</math> grams/100in²/24hours, and comply with other -033 requirements

Use SCC
Dri-Shield System-033
for JEDEC -033
Compliance

2. Humidity Indicator Card (HIC's)

J-STD-033 requires HIC's to meet MIL-I-8835 and provide sensitivity of either 5%,10%,15%, or 8%,10%,20%. SCC's HIC meets these requirements. Our card is 2"x3" and is packaged 125 cards per can.

3. Label

Our Moisture Sensitive Caution Label meets both J-STD-033 and JEP113 requirements. This 4"x4" adhesive label comes 100 labels per roll. SCC can pre-apply the labels to Dri-Shield 3000 bags.

4. Desiccant

SCC desiccant complies with MIL-D-3464, TYPE II as required by -033. We offer eight fractional unit and whole unit sizes in Kraft and Tyvek pouches.
